

JAMIE YORK PRESS

The Higher Purpose of Teaching Mathematics

World-renowned author, Waldorf math educator, and math missionary Jamie York will speak to parents about a developmentally based math approach that strengthens basic skills, fosters mathematical thinking, and sparks enthusiasm for learning. He will share how his approach to learning math in a Waldorf setting helps students see the bigger picture of how mathematics teaches us how to think, teaches perseverance and patience, fills us with awe and wonder, and helps students know what it means to be human.

TUESDAY, FEB 26 • 7 - 8:30 PM

Seattle Waldorf High School • 7777 62nd Ave NE • Seattle, WA

Jamie York holds two computer science degrees and began his career teaching math at a New Hampshire boarding school. After spending two years in Nepal serving as a Peace Corps volunteer, he taught middle and high school math at Shining Mountain Waldorf School (Boulder, Colorado) for 21 years. He now offers workshops internationally to inspire teachers to re-imagine mathematics. His *Making Math Meaningful*[™] books are the manifestation of his vision for a comprehensive mathematics curriculum that spans grades one through twelve.
